

VEIL__

creates a wall of light by sliding a lightweight fabric sleeve over the acrylic tubes which are suspended from the ceiling. The covering has a flap which wraps over the top of the tube to secure the system. A warm fluorescent light bulb is placed within each cylinder to create a warm, consistent glow throughout the fitting room.

This modular system allows for various options within each individual retail space. Veil can be arranged to suit the needs of the retailer by creating linear walls or curved walls. And the curtains can either be hung outside the fitting room or incorporated into the fixtures. The system allows for limitless styles and revisions by changing the color, pattern, or texture of the fabric sleeve.

Veil creates a flattering fitting room experience for the consumer through the wall of light, which is ambient, clean, and casts minimal shadows. Also, the system eliminates the cost and time it takes to build walls and allows the retailer to customize or change their arrangement with little time and cost.
