

HORIZON

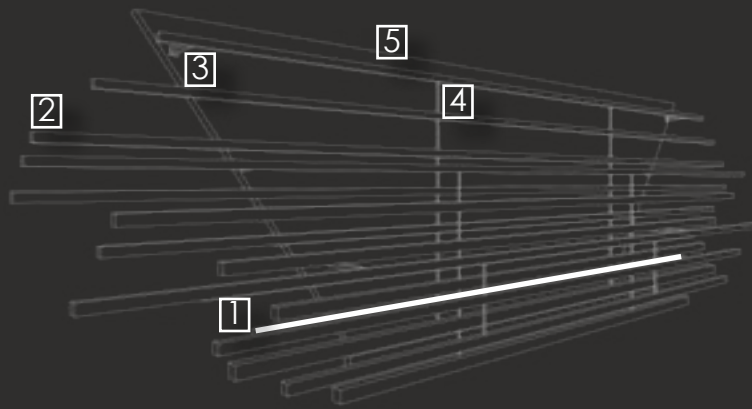

Every day, nature influences our behavior and mood through light. Inspired by the idea of light as a mood generator, the Horizon light pendant and wall sconce use horizontal lines and gradual variations in density to mimic the elements found in a sunset. This naturally occurring phenomenon of light is a reminder to slow down, relax, and appreciate the beautiful moments at the end of each day. Horizon contributes to the functionality of a wine bar by incorporating the same elements observed in our skies that are commonly associated with rest, triggering a psycho-behavioral response to relax and enjoy the moment.

HORIZON

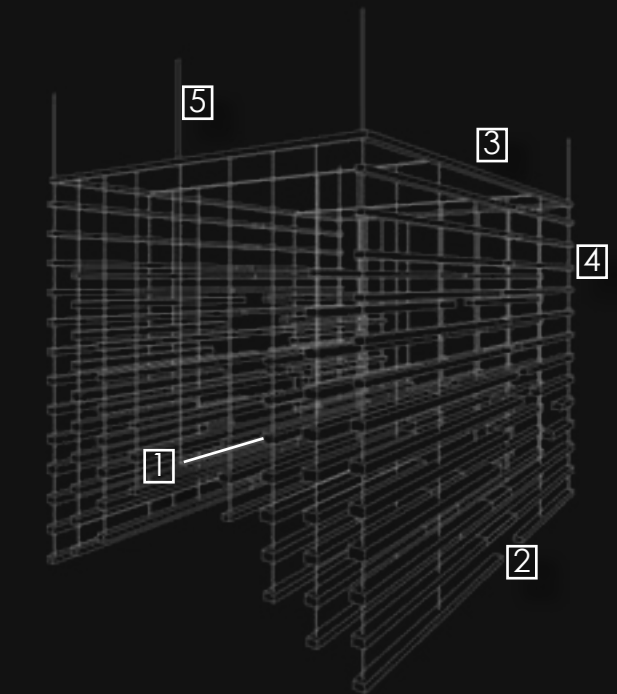

wall sconce

1. Programmable RGB color changing LED strip
2. Frosted acrylic tubes of varying widths
3. 1/4" dia. aluminum rods welded to plate
4. 1/8" dia. aluminum rods connecting acrylic tubes
